

Boston Tea Party Museum

Boston, Massachusetts

PROJECT SUMMARY

The ADA accessible gangway ramps leading to the famous replica ships at the Boston Tea Party Museum are GatorDock DRI Gangways. These long-span aluminum ramps have a structural truss design. The museum added an all-weather canopy to the custom designed frame. Electricity is run along the aluminum frame to provide lighting. Lastly, the slip resistant aluminum decking requires almost no maintenance and provides traction for all weather scenarios.

Installation
2012

Project for
Boston Tea Party Museum

Features
2 96 ft DuraRamp I Gangways
Aluminum Decking
ADA Handrail
Canopy Frame
