

# GatorDock

Marine Access Solutions

## Contemporary Hotel Marina

Orlando, Florida

### PROJECT SUMMARY

The series of dock systems at the Contemporary Hotel allow guests to travel freely between venues of this famous theme park. The large, custom marina caters to several sizes of watercraft as it features three separate systems: a ferry platform, marina with a dozen boat slips, and a custom rental boat corral. Each system features Gator's floating dock and gangway designs with aluminum decking. Several ADA design components are incorporated throughout the aluminum dock system.
