

## Glen Cove Marine Terminal

New York

### PROJECT SUMMARY

The Glen Cove Marine Terminal services the ferries that visit Manhattan, Yankee Stadium, Shea Stadium, La Guardia Airport, and Stamford Harbor. Seeing thousands of passengers a day, this GatorDock gangway and platform system needed to be heavy duty and low maintenance. The aluminum ramp design started with the foundation of the DRI gangway and incorporated custom rail, lighting, and ADA features. Aluminum decking was chosen as an all-weather, no-maintenance solution.

**Installation**  
2012

**Project for**  
Glen Cove Marine Terminal

**Features**  
Aluminum Platforms  
Aluminum Truss Gangways  
Custom Railing  
Custom Lighting  
Slip-Resistant Aluminum Decking
