

Lewes Boat Ramp

Lewes, Delaware

PROJECT SUMMARY

The handicapped accessible public boat ramp features six concrete launch lanes, four Full Float boarding docks and two Full Float courtesy docks. Additionally, there is a fully accessible, 8-foot wide boardwalk area designed into this project. Thanks to the Department of Natural Resources, boaters now have immediate access to the Delaware Bay, eliminating 15-20 minutes of no-wake-speed travel from the former ramp site. State Secretary Collin O'Mara called the project "... a recreational treasure that will allow current and future generations to enjoy the beautiful waters of Lewes. Further, this new facility is a model of sustainable practices that we must work to integrate into future building design."

Installation
2007

Project for
Delaware Department of Natural Resources and Environmental Control
