

# GatorDock

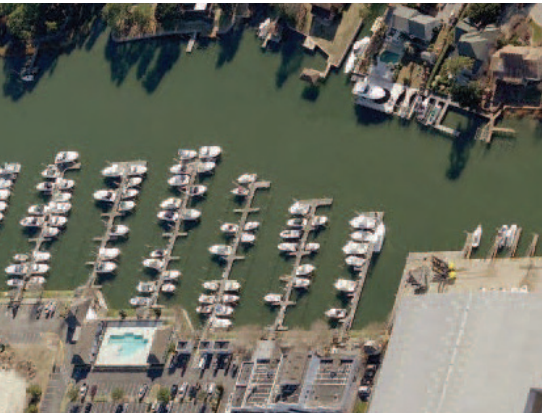

Marine Access Solutions

## Marina Shores Marina

Virginia Beach, Virginia

### PROJECT SUMMARY

Before 'green' was popular, the developers of this marina had two main goals: service to the customer and accountability to the environment. With GatorDock aluminum frames they answered both concerns with one solution. Their smart and responsible choice 20 years ago means now they can capitalize on aluminum's longevity and expand the marina instead of sending old and worn out docks to the landfill.

**Installation**  
1990

**Project for**  
Private Marina Owner
