

# MILFORD CANOE & KAYAK LAUNCH

MILFORD, DELAWARE  
Project Highlight

<b>Installation</b>	2011
<b>Project for</b>	DENREC
<b>Features</b>	Full Float Dock System Recessed Loading Platform Canoe Cradle Aluminum Toe Rail 2 and 3 Line Hand Rail

## Project Summary

Kayaking and canoeing are increasing in popularity as a recreational activity across the nation. Many municipalities are changing their boating access focus from motorized watercraft to non-motorized watercraft. Special design considerations need to be made when designing docks specifically for canoes or kayaks. The Delaware Department of Natural Resources and Environmental Control leveraged GatorDocks decades of design experience when building their canoe launch at Wilmont Greeway in Milford. The full float system increased stability while providing a low freeboard for easy loading and unloading. This system features custom aluminum canoe cradles and handlebars as well as toe curb for user safety.
