

# PINEY NARROWS MARINA

CHESTER, MARYLAND  
Project Highlight

<b>Installation</b>	2008
<b>Project for</b>	Private Marina
<b>Features</b>	26 Fingers Fixed Dock 30 foot spans between supports 52 Support Poles Pine Decking

### Project Summary

Pole supports for this marina were the concern for this project. Due to the depth the poles needed to be driven, cost to install each pole averaged over \$1000 each. GatorDock's™ lightweight aluminum frame allowed for spans of 30 feet between each set of supports, greatly reducing the cost of building a wooden dock system.
