

GatorDock

Marine Access Solutions

Piney Narrows Marina

Chester, Maryland

PROJECT SUMMARY

This East Coast marina loved the look of wood. However, the cost to build an all wood system was prohibitive. Installing a pole support averaged over \$1000 and a wooden pier would have needed a support every 8 feet. GatorDock's lightweight aluminum frame allowed for spans of 30 feet between each set of supports. By adding wood fenders and decking the Piney Narrows Marina achieved the look they wanted at a reasonable price.

Installation
2008

Project for
Private Marina

Features
Aluminum Fixed Pier Marina
Main Pier and 26 Fingers
Pine Decking
