

GatorDock

Marine Access Solutions

Texas A&M Research Marina

Galveston, Texas

PROJECT SUMMARY

As one of the pioneers of oceanographic education and research, Texas A&M has a deep-seated commitment to providing a high standard of services and facilities. When the time came to update their floating docks at Pelican Island, they chose GatorDock to provide a strong, durable, and worry-free system that allows their scientists, faculty, and graduate students to focus on research and discovery instead of maintenance and upkeep.

Installation
2010
