

Theme Park Ferry Docks

Orlando, Florida

PROJECT SUMMARY

The world's most famous theme park offers several transportation options to their guests. Guests travelling along their waterways board vessels via aluminum dock and gangway systems. The main entrance ferry platform featured here provides safe passage for thousands of adventure seekers every day. Several more marinas, docks, and attractions across the park have been built by GatorDock. Gator's durable, high-traffic designs and expert manufacturing have kept this client happy for decades.
