

# GatorDock

Marine Access Solutions

## Two Rivers Marina

Williamsburg, Virginia

### PROJECT SUMMARY

The developers of this marina had two main goals when choosing their dock: Long Service Life and Maintenance Free Solution. GatorDock's aluminum marine access structures answered both concerns with their fixed and floating dock designs. This 78 slip marina features wood decking, knee bracing for finger support and utilities which are run through the dock framing.

**Installation**  
2002
